

Draft:AvsPmod

From Wikipedia, the free encyclopedia

Submission declined on 29 May 2018 by Tazerdadog (talk).

This submission's references do not show that the subject qualifies for a Wikipedia article—that is, they do not show significant coverage (not just passing mentions) about the subject in published, reliable, secondary sources that are independent of the subject. Before any resubmission, additional references meeting these criteria should be added (see technical help and learn about mistakes to avoid when addressing this issue). If no additional references exist, the subject is not suitable for Wikipedia.

- If you would like to continue working on the submission, click on the "Edit" tab at the top of the window.
If you have not resolved the issues listed above, your draft will be declined again and potentially deleted.
If you need extra help, please ask us a question at the AfC Help Desk or get live help from experienced editors.
Please do not remove reviewer comments or this notice until the submission is accepted.

Comment: Most or all the sources are self published Legacypac (talk) 16:42, 21 May 2018 (UTC)

Comment: Cite third party sources: mainstream publication, magazines, newspapers and books. Avoid homepages. EROS message 05:02, 18 March 2018 (UTC)

AvsPmod (f. AvsP) is an open source AviSynth script editor, i.e. video script editor, written by Peter Jang and maintained by a community of enthusiasts. It's a tabbed text editor with AviSynth-specific syntax highlighting, autocompletion, made to simplify the development of scripts. AvsPmod has integrated video player, which shows the actual result of rendering AviSynth scripts.

It's officially recommended IDE/GUI by AviSynth developers. What really makes AvsPmod unique is the ability to create graphical sliders and other elements for any filter's arguments, essentially giving AviSynth a GUI without losing any of its powerful features.

History

The project was started in 2006 as AvsP by Peter Jang under GPL license, was actively developed for two years and became abandoned by its original developer. Since the beginning AvsP was published at Doom9 forum and became very popular in the video processing community. In 2010 it's development was continued as AvsPmod by forum members. In 2013 Diego Fernández Gosende created git repository https://github.com/AvsPmod/AvsPmod and started to maintain the development of AvsPmod along with other contributors.

Supported Frame Servers

Table with 3 columns: Frame Server, OS, Link. Rows include AviSynth (Windows x86), AviSynth+ (Windows x64 and x86), and AvxSynth (Linux).

Retrieved 20 March 2018. "This is all very wonderful, you might be saying, but no darn use to me if it involves having to write a script like that. So here's where I drop my mask of advanced geekery and tell you that I didn't actually write that script. Nor did anybody else. It was written for me by a particularly neat piece of software called AvsP. AvsP is a text editor that understands Avisynth a lot better than I do. And it can show me, frame by frame, what it's doing - it has its own built-in mini-Moviola, if you like. And like Avisynth, it's free."
^ Mostéfaoui, Soraya Kouadri; Ferreira, Giselle; Williams, Judith; Herman, Clem (2012-01-17). "Using Creative Multimedia in Teaching and Learning ICTs: A Case Study". European Journal of Open, Distance and E-learning. The Open University, UK. 15 (1). 464. ISSN 1027-5207. OCLC 615018740. Retrieved 20 March 2018. "Though it is possible to produce the AviSynth scripts using a standard text editor, the task can be considerably simplified by the use of the script editor AvsP which works in conjunction with AviSynth and includes a video previewer enabling the user to see the results of running a script. The main software suite used was, therefore, Audacity, AviSynth and AvsP. Between them these three provided the tools needed for students to create and edit audio material and to manipulate still or moving images, combining the audio and images to produce video output."

"Start AvsP, then drag the video.grf and audio.grf files to the AvsP window individually [...] We're building a script here that AviSynth will run, which is why it seems like programming."

C't magazin für computer technik, 24/2012, p.186 (in German). Karl-Wiechert-Allee 10, 30625 Hannover, Germany: Heise Medien GmbH & Co. KG. Retrieved 18 March 2018. "Dabei leistet der AviSynth-Editor AvsPmod wertvolle Dienste: Syntax-Highlighting verhilft zu mehr Übersicht, Autovervollständigung vereinfacht die Befehlseingabe und interaktive Slider helfen beim Positionieren von Elementen."

AvsPmod 2.5.1
Original author(s) Peter Jang
Developer(s) AvsPmod authors
Initial release 2006.09.04
Stable release 2.5.1 / 2013.06.25
Preview release 2.5.1-90 / 2017.03.24
Repository https://github.com/avspmod/avspmod
Written in Python
Operating system Windows, Linux
Platform IA-32 and x64
Available in English, Spanish, German, Portuguese, French, Russian, Japanese
Type Video editing software
License GNU General Public License
Website https://avspmod.github.io/
